Summary

Business intelligence and systems analyst experienced in dashboards, SQL analysis, data-quality controls, BI enablement, process automation, testing, and training content across Salesforce, Tableau, SharePoint, JIRA, Azure DevOps, and CRM operations environments.

Experience

Salesforce

USA

Portfolio Governance & Process Improvement Analyst

Apr 2025 – March 2026

- Defined data-quality requirements by embedding integrity, review, approval, fallback, and monitoring controls into AI-agent operations.
- Delivered BI enablement across Tableau, Data Cloud, AWS Private Offers, AI resources, and UAT, coordinating three days of cross-training that improved technical readiness for teams.
- Strengthened AI content readiness by improving documentation, metadata, tagging, duplication controls, and retrieval quality.
- Established post-implementation monitoring plans for KPI improvement, policy adherence, compliance, control effectiveness, and benefits realization, strengthening sustained performance visibility across Finance Operations controls programs.
- Standardized AR, Credit, and Collections processes across Salesforce ecosystem tools, improving reporting visibility.
- Translated V2MOM priorities, PAM findings, QBR insights, operational risks, and leadership objectives into measurable roadmaps focused on cash flow, compliance, customer experience, automation, and scalability.

Market Maker CRE

USA

Product Operations & Program Analyst

Jan 2025 – Apr 2025

- Delivered actionable reports and data visualizations from property analysis, improving insight visibility for teams and clients.
- Validated system functionality and data accuracy by developing and executing test scripts, strengthening platform reliability and confidence in real estate analytics outputs for client decisions.
- Launched a 0-to-1 SharePoint intranet, organizing documents, communication, project tracking, and collaboration.

Business Systems & Product Analyst

Aug 2024 – Dec 2024

- Analyzed property data with SQL to improve listing alignment and increase customer retention 22%.
- Built a 0-to-1 SharePoint intranet for product, sales, and marketing teams, centralizing document management, communication channels, and project tracking across departments.
- Improved workflow coordination by reducing information silos and connecting product development, sales, and marketing activity through SharePoint.

Vista Research Services

USA

Product Analytics & Automation Analyst

May 2024 – Apr 2025

- Built client-facing visualizations translating fraud-detection outputs and survey analytics into actionable business insights.
- Defined requirements, prioritized roadmap work, led sprint planning, and tracked JIRA milestones to convert a business opportunity into a scalable analytics platform for survey operations.
- Guided executive leadership on AI use cases and analytics opportunities for Vista's growth strategy.
- Coordinated agile delivery through backlog prioritization, timeline tracking, sprint planning, and JIRA execution, keeping product development aligned with business priorities, delivery goals, and stakeholder expectations.

LTIMindtree

India

Agile Delivery, BI & Quality Analyst

Aug 2021 – Aug 2023

- Developed Tableau visualizations and root-cause analysis for system issues, bottlenecks, and quality trends.
- Led ETL testing during migration to identify data inconsistencies, system defects, and migration risks, improving defect detection by 60% while reducing post-migration application exposure.
- Strengthened release readiness by validating defects, coordinating issue resolution, and supporting testing documentation.
- Validated data migration quality across 22 projects in Azure DevOps, checking ETL processes, data accuracy, and migration correctness to protect integrity during environment transitions.

Skills

Methods: Agile delivery, UAT coordination, Roadmap planning, Process mapping, Requirements definition

Operations: BI delivery, RevOps, Research ops, Release readiness, Content governance

Analytics: Dashboarding, SQL analysis, ETL testing, Root-cause analysis, Data validation

Systems & Stack: CRM automation, BI suites, Data migration, AI operations, Collaboration systems

Tools: Tableau, SQL, Salesforce, SharePoint, Azure DevOps

Education

M.S. Technology Management – University of Illinois, Urbana Champaign

Aug 2023 – Aug 2024
