Summary

Business operations analyst experienced in documentation accuracy, control execution, data validation, workflow improvement, reporting, and cross-functional coordination across revenue operations, business systems, SaaS platforms, and analytics environments.

Experience

Salesforce

USA

Revenue Operations, Governance & Controls Analyst

Apr 2025 – March 2026

- Used Microsoft Office and reporting inputs to translate V2MOM, PAM, QBR, cash-flow, compliance, and customer-experience priorities into governed revenue-operations roadmaps for leadership portfolio decisions.
- Processed and audited transaction documentation and SOX ELC.8 controls through governance reviews, self-inspection, accurate reporting, proactive risk identification, and disciplined control execution.
- Reconciled documented procedures with actual operations through interviews, sampling, data validation, control testing, and documentation reviews.
- Coordinated overflow dependencies across 13 Finance, Revenue Operations, Systems, Sales Operations, M&A, Audit, and Customer Service teams, clarifying owners and accelerating AR execution.
- Standardized net-new AOV reporting inputs and definitions to improve Credit and Collections decision accuracy.
- Sequenced business units through discovery, audit review, solution design, implementation tracking, monitoring, and enablement planning to create a repeatable continuous-improvement rhythm across teams.

Market Maker CRE

USA

Revenue Strategy & Financial Analysis Analyst

Jan 2025 – Apr 2025

- Validated data-entry accuracy, system functionality, and platform reliability through structured test scripts and QA execution.
- Audited product workflows and internal systems while aligning technology infrastructure and leadership priorities with evolving business needs to support scalable, tech-driven operating improvements.
- Created property-data reports and visualizations that improved operating visibility for internal teams and clients.

Business Systems & Revenue Data Analyst

Aug 2024 – Dec 2024

- Maintained accurate client-facing SaaS operations by validating system data flows, calculations, and platform functionality.
- Performed clerical-style system documentation by mapping process steps, identifying optimization opportunities, clarifying workflow charts, and improving execution consistency across internal teams.
- Analyzed property data with SQL, improving customer-listing alignment and increasing retention by 22%.

Vista Research Services

USA

Analytics, Automation & Operations Analyst

May 2024 – Apr 2025

- Trained delivery teams through requirements definition, roadmap ownership, sprint planning, and JIRA milestone tracking.
- Simplified analytics-platform interactions for internal teams and external clients by reducing manual friction, automating repetitive steps, and improving the end-to-end user experience.
- Improved client service by aligning platform usability, analytics outputs, and communications with user needs.
- Managed scope, budget, resources, timelines, and delivery risks while negotiating executive priorities to balance business needs, technical feasibility, and available execution capacity.

LTIMindtree

India

BI, Data Quality & Systems Analyst

Aug 2021 – Aug 2023

- Performed documentation and reconciliation work by standardizing testing records, validation practices, defect reports, and quality controls.
- Led ETL testing during migration to identify data inconsistencies, system defects, and migration risks, improving defect detection by 60% and strengthening release confidence.
- Modernized QA operations using Azure DevOps, Tableau, Citrix, VB, and Compare to improve defect visibility.
- Developed Tableau visualizations and root cause analysis for clients to clarify system issues, performance bottlenecks, quality trends, and targeted application improvement opportunities.

Skills

Methods: Lean process improvement, SAFe delivery awareness, Requirements gathering, Process mapping, Peer enablement

Operations: Revenue operations, Audit readiness, Payment controls, Quality assurance, Client service operations

Analytics: Data validation, Dashboard reporting, Root cause analysis, SQL analysis, Defect tracking

Systems & Stack: CRM processes, Business systems validation, SaaS platform operations, Revenue reporting processes, Lifecycle automation

Tools: Microsoft Office, SQL, JIRA, Azure DevOps, Tableau

Education

M.S. Technology Management – University of Illinois, Urbana Champaign

Aug 2023 – Aug 2024
